Eco-play®

Veel kinderen groeien op tussen beton en ijzer, terwijl een groene leefomgeving noodzakelijk is voor een goede ontwikkeling. Het bewustzijn groeit dan ook meer en meer dat groen de gezondheid en het welzijn van jong en oud kan verbeteren. Kinderen worden aangemoedigd om te spelen met respect voor de natuur. De laatste jaren worden dan ook veel speelterreinen uitgerust met natuurlijke materialen zoals boomstammen, houten speeltoestellen, ...

Uit onderzoek blijkt immers dat natuurlijk spelen unieke uitdagingen en leermogelijkheden biedt voor kinderen. Ze vinden spelen leuker en het maakt hen rustiger. Groene speelterreinen nodigen ook meer uit tot intensief en gevarieerd bewegen.

Eco-play is een ecologisch gamma van speeltoestellen, voornamelijk opgebouwd uit de houtsoort robinia. Avontuurlijke toestellen met een hart voor de natuur, perfect passend in een groene omgeving.

De missie van Eco-play:

*"Eco-play maakt kinderen blij door natuurlijke speeltoestellen
- voor openbaar gebruik - te ontwerpen en te produceren."*
